

Code Review By and For Scientists

- Two-part study by Prof. Marian Petre (OU)
- 2013: professional developers review code submitted with PLOS Computational Biology paper
 - Scientists liked the idea...
 - ...but end-of-cycle reviews aren't useful...
 - ...and programmers can only do shallow reviews
- 2014: mentors teach small scientific coding groups the practice of code review
 - Much more useful
 - Perspective, perspective, perspective...
